Putting people at the heart of strategy to drive success. It is not enough to have interested passengers. Vehicles need drivers. Investing in human capital development provides your drivers with the keys for excellence.

KNOWLEDGE E TRAINING & CONSULTING SERVICES

In a world that’s moving faster than ever, the availability, quality, and pursuit of knowledge is fundamental for advancement. Knowledge E works at the heart of the global knowledge economy by supporting nations, institutions, corporations, and individuals in becoming knowledge-based and innovation-driven leaders.

OUR SERVICES

Knowledge E’s bespoke training and consulting programmes support governments, higher education institutions, and research centres in building thriving knowledge economies. We design and deliver transformative projects that blend practical capacity building training with strategic consulting to maximise successful outcomes in line with institutional and national goals. Our unique expertise, a global network of professionals, and agile service delivery drive our programmes to stimulate a measurable change in knowledge, values, and behaviour, producing tangible returns on investment.

In a world that’s moving faster than ever, the availability, quality, and pursuit of knowledge is fundamental for advancement. Knowledge E works at the heart of the global knowledge economy by supporting nations, institutions, corporations, and individuals in becoming knowledge-based and innovation-driven leaders.
Knowledge E offers universities, research centres, and government bodies consulting services that provide insights and recommendations to support policy decisions, influence strategies for improvement, and create implementation frameworks and systems.

We support our clients in achieving their goals through strategic planning and effective implementation in:

- Improving research output & impact
- Facilitating research commercialisation, technology & knowledge transfer
- Reforming curriculum & fostering teaching excellence in higher education
- Enhancing international reputation & supporting ranking ambitions

The programme exceeded my expectations with regard to organisation, content, and amount of knowledge introduced. The great resources, plenty of activities, continuous feedback, and fruitful discussions were really amazing. The diversity of the participants from different disciplines was great and inspiring.

Our expert consultants engage to deeply understand the relevant needs, analyse underlying data from industry-leading providers, and interpret findings in the context of the organisational goals of our clients to produce high-impact deliverables.
We approach each project with the mindset of a long-term partner rather than simply a training provider. We’re committed to ensuring quality and sustainability as we leverage our domain expertise, expansive industry network, and dedication to innovation to best serve our clients.

Below is a sample of the most popular courses within our domains of expertise. Request the course catalogue for our full list of courses.

**Research Excellence**
- Research Commercialisation & Academic Entrepreneurship
- Unpacking Bibliometrics & Boosting Citations
- Modern Trends for Improving Research Visibility & Impact
- Scientific Presentation Skills for the 21st Century
- Grant Writing & Application

- Curriculum Reform, Design, & Implementation
- Knowledge-Based Assessment
- Skills-Based (Workplace) Assessment
- Experiential Education & Interprofessional Education
- Promoting Active Learning in Small & Large Group Settings
- Mentorship & Student Development
Our programmes focus on achieving tangible learning outcomes through highly interactive workshops that empower learners to achieve practical results and success beyond the classroom. Feedback from participants indicate that our programmes stimulate a measurable change in knowledge, values, and behaviour for our participants.

We are dedicated to ensuring quality, human capital development, and sustainable learning by implementing the following principles:

**ANDRAGOGY (ADULT LEARNING)**

Adult learning is distinct from school-based learning. Adult learners are motivated by practical needs and respect for their experience. By understanding and utilising the ‘5 Key Assumptions’ and the 4 principles of andragogy, we create learning experiences that are well suited to our participants.

**EXPERIENTIAL EDUCATION**

Experiential education involves the application of theory and content to real-world experiences. By ensuring our workshops revolve around achieving practical outcomes, our participants’ learning brings them one step closer to gaining hands-on experiences.

**DIFFUSION OF INNOVATION**

Diffusion of innovation takes place in a social system as people assess the impact of change on their work and lives. We drive this impact by imparting knowledge and skills that can be disseminated by our participants to others across their networks.

Our commitment to the above principles allows us to deliver practical outcomes, foster sustainability and self-sufficiency, drive innovation and creativity, ensure quality, inspire proactive learners, and maximise ROI.
At Knowledge E, we believe that being a part of the Knowledge E family means becoming part of something bigger: inspiring positive change in the world while shaping the future of the global knowledge economy.

The Training and Consulting team are a multinational team of innovators, researchers, and strategy experts who draw on the insights of the Knowledge E course leaders to help shape our workshops and programmes. Our programme coordinators will be available to your institution throughout your journey with us from start to finish to ensure smooth delivery and powerful outcomes.
