Professional AI use in Higher Education

Get access to our full programme for your institution today

What You'll Learn

Professional AI Use in Higher Education is a three-course programme that supports professionals as they navigate becoming effective AI collaborators. From learning basic definitions of AI to creating goals to become the AI subject matter expert in the office, this programme supports professionals in university settings and beyond in:

- understanding and increasing AI literacy,

- incorporating AI into daily tasks,

- recognising the impact of AI at the organisational and societal levels,

- developing ethical standards for AI use,

- and creating plans to continue AI learning.
