ZENDY

Accelerate research with a unified search experience with trusted resources

Facing budget cuts and reduced access to key subscription content? Feeling at a loss due to risks related to AI use, open access, and predatory publishing practices?

Zendy now offers research libraries a solution to overcome these challenges and empower faculty and students with the next generation AI discovery and literature review platform. Get seamless access to trusted open access and subscription content in one unified, safe space – combining academic integrity with practical AI support..
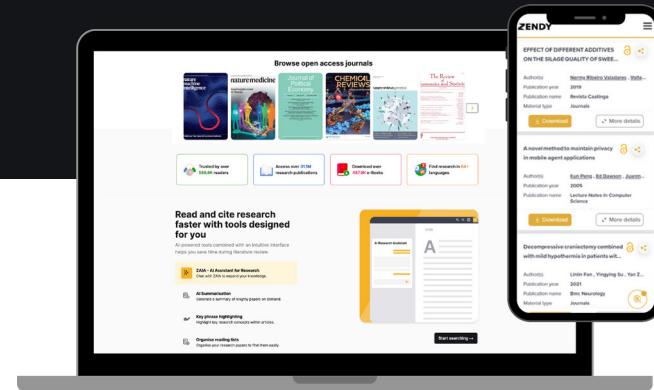

How Zendy can support

- Continuously curated and **publisher-licensed content** ensures accuracy and trust.
- **Hosted full-texts** provide more relevant search results, seamless access, and faster AI-assisted review.
- **Agentic AI architecture** designed specifically for research discovery and literature review.
- **Scalable infrastructure** with straightforward integration into library systems, repositories, and websites.
- **Affordable** solution that complements or replaces existing subscriptions.

Whether you are only just integrating AI in your library or ready to transform your institutional discovery completely, reach out to assess your level of AI-empowerment today!

Elevate your discovery journey

Depending on your desired level of AI-empowerment you can:
- Add all your current content subscriptions for AI-discovery and seamless access on Zendy
- Index your library catalogue, repository, CRIS/RIMS and libguides for both discovery and AI assistant
- Make use of Zendy as AI assistant anywhere on your website and as an app for all your colleagues, faculty and students

Contact Zendy

Navigate AI with confidence and receive complimentary access to an accredited AI literacy course for your institution after your assessment.
