Cambridge Aspire

Enhancing teaching & learning

The Cambridge Aspire website offers high-quality higher education teaching and learning resources with key functionality at sustainable price points.

Cambridge eTextbooks are obtainable via an annual lease, with title-by-title pricing available as well as the full collection, all HSS textbooks, all STM titles, and 17 individual subject collections.

As new textbooks are published, each is added to the appropriate collection. Pricing is not based on course size,and allows for unlimited concurrent user access for your institution. All collections offer a reduced price per title.

With a collection lease, KBART title lists and MARC records tailored to your institution can be downloaded from your organisation account area on Cambridge Core.

Contact your usual sales representative for your institution's pricing or send an email to library.sales@cambridge.org for complete details.

What our customers say

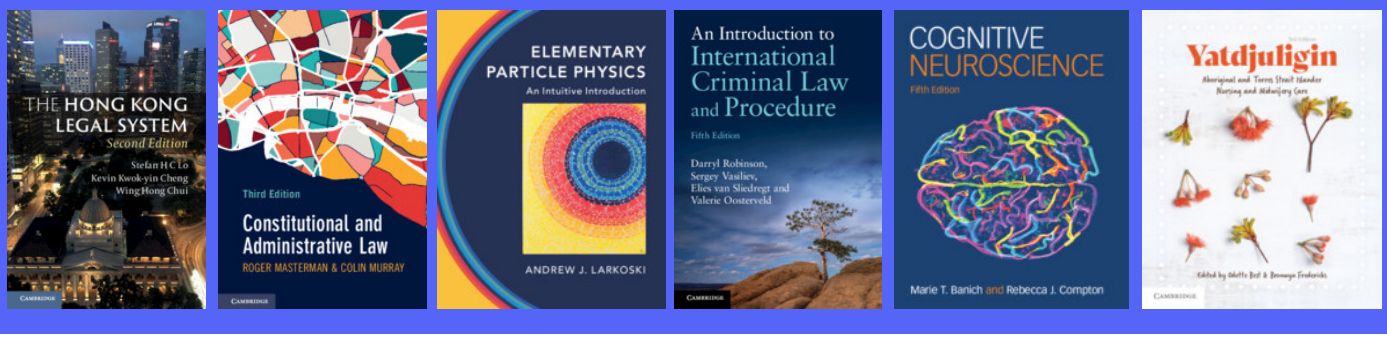

"From a librarian point of view, the Cambridge Textbooks subscription work is the smoothest for the librarians than any other teaching collection we have."

Quote from the Senior Assistant Acquisitions and Access (ebooks) librarian at a Jisc Band I institution.

"For our Cambridge content last year, HE (Cambridge Aspire) represents just 21% of the titles but is responsible for 59% of our usage... HE from CUP (Cambridge Aspire) provides good value for money for us."

Quote from the Head of Resources at a Jisc Band 4 institution.
